1 Introduction

Dear Customer, we would like to thank you choosing our ultimate Metering System Solutions software (hereinafter MSS).

This document shows you all steps up to the download of the software.

1.1 Overview of the available software components

MSS consists of software components, each of them designed to fulfil certain tasks within automated meter readout and meter configuration for the metering products of ZENNER.

MSS is easy to handle. The installation process is fast, the generation of the license key through the internet is simple. You will find yourself oriented in the structure of the program from the very beginning.

MSS requires third parties' software components such as Microsoft's ".NET framework", which are to be activated as preinstalled parts of the Operating Systems and are not part of the ZENNER GMM software. The respective trademarks and trade names of the third party software components belong to the corresponding owners.

1.1.1 MSS Demo License

The MSS Demo License allows you to configure the non-protected parameters in ZENNER electronic devices as follows:

- zelsius® C5 compact heat meters with or without Pulse, M-Bus or wM-Bus radio interface
- EDC modules with Pulse, combined Pulse + M-Bus, M-Bus, wM-Bus or LoRa radio interface
- PDC wM-Bus pulse counting radio modules
- Micro EDC modules for capsule water meters with wM-Bus or LoRa Radio interface
- Caltos E heat cost allocators (HCA) with wM-Bus or LoRa radio interface
- Easy Protect smoke detectors with wM-Bus or LoRa radio interface

This License level contains the following components:

- Configuration – device configuration interface
- Users – user management interface

2 First Installation
